

DENDRITICS LLC

**DYNASEAL
END GRAIN SEALER**

WOOD PROTECTION Starts at the End.

- ◆ Helps prevent wood from cracking, end checking, splitting, and warping
- ◆ Ultra-low VOCs, safe for the environment
- ◆ Waterproofs and protects against water, mold and mildew stains
- ◆ Paintable and stainable
- ◆ Non-film-forming, clear formula won't discolor surfaces
- ◆ Easy to apply
- ◆ Fast cleanup with soap and water

Prevent water absorption of the ends of all types of wood including green logs with eco-friendly, water-based Dynaseal End Grain Sealer. One coat protects against splitting, end checking and decay. The long lasting, non-wax formula waterproofs and stabilizes wood from warping, helps resist mold, mildew stains and rot. Made in the U.S.A.

You license it. You label it.

Give your customers the long-lasting surface protection they need with a product they can trust, sold by you. Comes in 55-gallon drums. Email info@dendriticsllc.com to learn more about pricing and licensing.

New Construction and Repairs,
Green Logs, Decks,
Fences, Docks, Piers,
Wood Structures,
Playgrounds,
Planters, Furniture,
Log Homes

LEARN MORE

Revolutionary nanotechnology provides a powerful, protective barrier.

Unlike most sealants that sit on the surface — Dynaseal uses nanotechnology to penetrate deep into wood. This creates a breathable, flexible barrier that becomes part of the cellular structure, preventing water from seeping in while allowing moisture to escape.

“Green” formula gives customers peace of mind.

Safe for humans, animals, and plants, Dynaseal’s water-based, odorless formula has ultra-low VOCs.

Add significant value to raw materials.

To produce the highest quality cut-lumber apply one coat of End Grain Sealer and one coat of Dynaseal DS 300 — a clear nano-tech penetrating sealer that provides years of protection by reducing fungal and microbial attack by reducing available moisture.

Quick to apply, fast to dry, easy to clean up, safe to store.

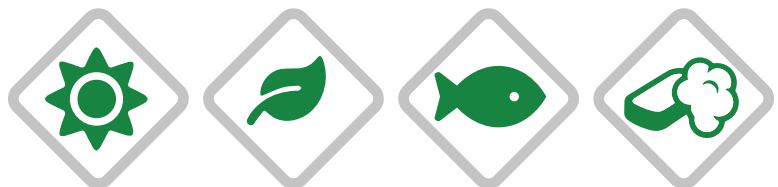

No need to wait for warm weather to apply. If the temperature is above 34°F/1°C, you’re good to go. Store indefinitely without worry since formula is nonflammable (fireproof class B). Cleans up easily with soapy water.

One-coat application cuts labor costs in half.

Unlike popular competitors that require two coats to get the job done, Dynaseal’s End Grain Sealer unique formula has a higher level of solids, allowing you to coat once and be done. This means the product lasts twice as long but takes half the time to apply.

Helps reduce costly damage.

In new construction and repairs all cut ends should be sealed with End Grain Sealer. The product can be applied by brush, paint pad and spray. These simple steps do not take much time and can save dollars in damage.

ABOUT DENDRITICS

Inspired by advanced nanotechnology. Driven by outstanding performance.

Dendritics LLC was founded by Hank Croteau, a leader in the industrial supply and coating business for more than 30 years, and Mike Cork, a polymer chemist with 9 patents. Joined by a shared commitment to protect the environment and the health and safety of their customers, Dendritics manufactures eco-friendly products that not just work but outperform their competitors
